

Amit Kumar

Smart Contract Engineer | DeFi Protocol Developer

nextech.amit@gmail.com | +91 91494 59691 | [GitHub](#) | [Portfolio](#) | India | Remote

SUMMARY

Solidity Engineer who has built and shipped **10+ production DeFi protocols** to **Base Mainnet and EVM testnets**: insurance vaults, perpetuals DEX, DAO governance, ERC-4337 gasless wallets. Expertise in EVM security, Foundry invariant suites, Chainlink CCIP, UUPS proxies, and flash-loan-resistant governance. **Zero high-severity Slither findings across 40+ verified contracts**; security model covers flash-loan resistance, oracle staleness guards, and CEI-enforced reentrancy protection. Comfortable with async remote workflows and team codebases; actively seeking full-time remote opportunities in Solidity / Smart Contract development.

TECHNICAL SKILLS

Languages	Solidity 0.8, TypeScript, JavaScript, Yul, EVM inline assembly
Standards	ERC-20, ERC-721, ERC-1155, ERC-4337, ERC-4626, ERC-5484, EIP-712, EIP-1967 UUPS
Protocols	Chainlink VRF, CCIP, Price Feeds, Aave V3, OpenZeppelin, Hardhat, Remix IDE
Testing	Foundry (unit, fuzz, invariant, fork), Echidna, Slither, Mythril, 4-layer suites, 95%+ coverage
Security	CEI pattern, ReentrancyGuard, SafeERC20, Ownable2Step, flash-loan resistance, oracle staleness guards
Infra	Git, Vercel, IPFS, Pinata, Node.js, CREATE2, Basescan, Etherscan verification
Frontend	Next.js 14/15, Wagmi v2, Viem, RainbowKit, TanStack Query v5, Framer Motion

EXPERIENCE

Independent DeFi Protocol Engineer

Jan 2024 – Present

Open-Source Remote India

- Shipped **10+ full-stack DeFi protocols** to **Base Mainnet and EVM testnets**; complete Foundry suites, Slither audits, Basescan/Etherscan verified contracts; **zero high-severity findings across 40+ contracts**
- Eliminated gas costs for end users via **ERC-4337 Account Abstraction** (verifying paymasters, session keys, CREATE2 smart accounts) across 3 protocols, removing the primary Web3 onboarding barrier
- Cut gas **20–35% per protocol** via storage packing, `constant/immutable` vars, custom errors, unchecked arithmetic, and $O(1)$ swap-pop arrays

PROJECTS

Sentinel Insurance Protocol [\[live\]](#) [\[github\]](#)

May 2026

Solidity 0.8.24 ERC-4626 Aave V3 DAO Governance ERC-5484 Base Mainnet

- ERC-4626 vault routes idle USDC into Aave V3 yield; flash-loan-resistant DAO via `getPastVotes(block.number-1)`; soulbound PolicyNFTs with on-chain SVG; **8 contracts on Base Mainnet, Basescan verified; Slither: 0 high / 2 medium validated**

Nexus Perpetuals DEX, Gasless 50× Leverage [\[live\]](#) [\[github\]](#)

Jan 2026

Solidity ERC-4337 Chainlink CCIP + Oracles 5 Isolated Layers Sepolia

- ERC-4337 paymaster sponsors 100% of gas; Chainlink oracles with staleness guards; CCIP cross-chain margin with nonce dedup; `MINIMUM_LIQUIDITY` burn prevents LP inflation; **full invariant suite with zero solvency violations across all fuzz runs**

Sentinel DAO, Anti-Flash Governance [\[live\]](#) [\[github\]](#)

Nov 2025

Solidity TimelockController Aave V3 Treasury ERC-4337 Rage-Quit Sepolia

- 48H `TimelockController` + `VetoCouncil` rage-quit blocks flash-governance; Aave V3 treasury yield; ERC-4337 gasless voting; `ProposalGuard`; **256 tests, zero failures; treasury solvency fuzz-proved**

RST Protocol, On-Chain Reputation [\[live\]](#) [\[github\]](#)

Apr 2026

Solidity ERC-5484 Soulbound UUPS Upgradeable Sepolia

- ERC-5484 soulbound tokens with 5-tier SVG medals auto-upgrading on score change; UUPS proxy keeps scoring upgradeable while SBT records stay immutable; **4-layer test suite**, overflow and uniqueness fuzz-proved

Core Protocol Suite [\[github\]](#)

2024 – 2025

Solidity Foundry EVM

- DSC Stablecoin** — overcollateralised stablecoin with 10,000-run invariant fuzz suite; **UUPS V1→V3 Migration** — live proxy upgrade path with storage-collision-safe layout
- Additional open-source implementations on [GitHub](#): Merkle+EIP-712 Airdrop (MEV-resistant), Chainlink VRF Lottery, ERC-721 Dynamic SVG NFTs, ERC-20 Fundraise with RBAC & circuit breaker

EDUCATION & CERTIFICATIONS

Cyfrin Updraft — Advanced Solidity and Smart Contract Security

2024

Patrick Collins | Industry-leading DeFi protocol engineering and security audit curriculum

Alchemy University — Ethereum Developer Bootcamp

2024

EVM fundamentals, smart contract deployment, Web3 frontend integration

Bachelor of Science (B.Sc.) — Cluster University of Jammu

2027

Currently enrolled | Pursuing alongside full-time open-source development work
